SAFE WATER SPOKANE PETITION		
The undersigned oppose water fluoridation in Spokane.		
Numerous peer-reviewed scientific studies have found fluoridation to be a major risk to human health, minimally (if at all) effective, an environmental		
risk and a wasteful, excessive expense. Moreover, it is unfair to low-income families who can't afford unfluoridated bottled water or expensive		
filters to avoid it, denying them the right	to choose what drugs to ingest.
